[Pierce County Relicensing Programs For Parents](#)

NEARLY 8,000 CHILDREN
in Washington are currently in foster care, resulting in a critical need for families that can provide safe, loving homes for youth who have experienced abuse and neglect.

Homes are urgently needed for foster children, especially:

- Sibling groups of three or more
- Youth age 12 and older
- Native American, African American, Hispanic and other children of color
- Infants to three-year-olds
- Children who need behavioral and emotional support
- Gay, lesbian, bisexual or transgender children
- Children with significant medical needs

Let Fostering Together help you

Fostering Together is dedicated to helping ensure that every child has a safe place to call home. We provide support and information for potential foster parents and assistance through the foster licensing process. We also offer FREE liaison services and support to current caregivers, including licensed foster and adoptive parents and kinship providers. This includes:

- Support groups and training
- The Foster Intervention Retention and Support Team (FIRST)
- Connection to community partners and donations
- Information on state and private agency processes

Fostering Together was developed in partnership between the state of Washington and Olive Crest – a national leader in transforming the lives of at-risk children since 1973.
